

Bitcoin Lightning Network Beta Program

BitGo is launching an exclusive beta program for our new partnership with Voltage, the premiere Lightning Network payments provider. Participants will be testing out our newest API, enabling ultra-cheap, near-instant bitcoin transactions.

Beta Program Details

This exciting collaboration empowers BitGo's clients to scale bitcoin transfers with unmatched speed, cost efficiency, without sacrificing institutional-grade security. Integrating Lightning payments enhances Bitcoin's enterprise utility and offers a scalable, efficient alternative for bitcoin, and soon stablecoin, settlement.

The beta program is designed to run for 4 weeks to give participants sufficient time to evaluate the impact of our enhancements on your operations. During this period you will be asked to attend scheduled meetings to discuss your experience and provide feedback.

The proposed meeting cadence is:

- A 30 minute beta program onboarding call to explain the program, expectations, etc.
- Once a week, 15 minute feedback sessions
- A final 45 minute debrief call at the end of the 4 weeks to discuss overall thoughts and next steps

Benefits of Joining the Beta Program

Participants in the beta program will benefit from the following:

- **Ultra-cheap, near instant bitcoin transactions:** Experience the time and cost savings that come with leveraging Lightning Network for BTC transactions
- **Early adopter advantage:** Participants will be among the first to experience our Lightning Network integration
- **Influence on product development:** Participation in the beta program will allow you to communicate directly with our R&D teams in addition to potentially influencing future product development

Beta Program Eligibility Requirements

To ensure participants are able to sufficiently test our Lightning Network integration, we are seeking participants that meet the following criteria:

- Make at least 50 bitcoin transactions per day that cumulatively total .001 BTC
- Not located in Singapore or Dubai

As a participant, we encourage you to provide feedback on the following areas:

- API designs and performance
- Actual value of fee savings

For more information check out our [Lightning Network documentation](#).

About BitGo

BitGo is the leading infrastructure provider of digital asset solutions, delivering custody, wallets, staking, trading, financing, and settlement services from regulated cold storage. Since our founding in 2013, we have focused on enabling our clients to securely navigate the digital asset space. With a large global presence through multiple regulated entities, BitGo serves thousands of institutions, including many of the industry's top brands, exchanges, and platforms, as well as millions of retail investors worldwide. As the operational backbone of the digital economy, BitGo handles a significant portion of Bitcoin network transactions and is the largest independent digital asset custodian, and staking provider, in the world.
